VPA-10

10 Watt Back ground music and utility amplifier

Specifications:

- 10 watt rms power output into 4 or 8 Ohms
- 10 watt rms power output into 25 and 70 volt
- Input: Selectable Mic (-56 dB) or Line (+4 dB) level
- Frequency Response : 20 to 20KHz +/- 1dB
- Two 150 ohm microphone inout
- One 10K ohms program Line Input
- Front Pannel Base and Treble Controls
- Optional Telephone Page Input.
- Electrical requirement : 117 Volts 60 Hz

SPECIFICATIONS:

VPA-10

The VPA10A is a versatile 10 watt background music amplifier. This versatile amplifier features a high performance transistor power amplifier with output capability of 10 watts (rms) into a 4 or 8 ohm load, as well as 25 and 70 volt line loads. Output protection consists of current limiting, transient suppression diodes and AC fuse.

The preamplifier sections includes built-in muting ciruity and feedback type bass and treble controls. Input capability of the basic unit provides unit provides for for unbalanced medium level program input with a front panel gain control and a rear panel sensitivity control.

The specifications are as follows:

Gain: 26 db. (Hi-Z), 66 db. (Lo-Z)
Max. output: 10 Watts (rms) into 8 Ohms, 25 and 70 volts
Hum & Noise: -46 dbm (67 db below Max output)
Input Impedance: Mic 1 - 50 Kilohms (Hi-Z),
Mic 2 / telco 600 ohm (Lo-Z)
Program - 1 Kilohm (Lo-Z)
Dimensions: 14"W x 3.75"H x 8.5"D
Weight: 12 lb.
